

LSM6DS3::Accelerometer
_High_perf_Disable

LSM6DS3::Accelerometer
_High_perf_Enable

LSM6DS3Core::LSM6DS3
_register_write

```
graph LR; A[LSM6DS3::Accelerometer_High_perf_Disable] --> C[LSM6DS3Core::LSM6DS3_register_write]; B[LSM6DS3::Accelerometer_High_perf_Enable] --> C;
```

The diagram illustrates two function calls. On the left, two white rectangular boxes represent the source functions: 'LSM6DS3::Accelerometer_High_perf_Disable' (top) and 'LSM6DS3::Accelerometer_High_perf_Enable' (bottom). On the right, a gray rectangular box represents the target function: 'LSM6DS3Core::LSM6DS3_register_write'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both source functions call the target function.
